

Dynamo

Circuit Board and Electrical Contact Cleaner

Power Away Dirt On Delicate Electronics.

Electrical components need to be free of dust, lint and dirt free to maintain peak performance. That can be a tough job in today's working environments.

ZEP Dynamo is a highly effective spray cleaner designed specifically for cleaning electrical components.

- **Quickly removes soils, dirt and lint**
- **Formulated with fast-evaporating solvent**
- **Dries residue free**
- **Low odor**
- **High dielectric strength**
- **No ozone-depleting compounds or chlorinated solvents**

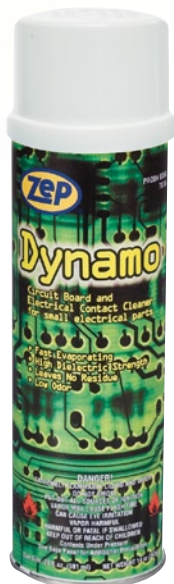

- **Ideal for cleaning:**

- Circuit boards
- Electrical wiring

Small electrical components like:

- Motors
- Transformers
- Relays
- Contacts
- Switches
- Timers
- Receivers
- Transmitters
- Telephone equipment

Exclusively For Use By Trained Professional Service Personnel.

ZEP Dynamo is a highly effective electrical component cleaner when all label directions and precautions are followed.

Directions: Turn off electrical equipment and circuits before using this product. Spray 4 to 6 inches from surface to be cleaned. Clean parts from top to bottom to flush away soils. Use extension tube for hard-to-reach areas.

Caution!: DO NOT use while equipment is energized.

Dynamo is extremely flammable. Keep away from heat, sparks, open flame or any source of ignition

Product is not plastic safe. Always use on a test area to ensure compatibility.

Label directions and precautions must be followed exactly.

ZEP Manufacturing Company will not be responsible for any injury, loss or damage if product is used in any manner not in compliance with label directions or if precautions are not observed.

Contains:

Heptane: 142-82-5
Alcohol Mixture: 67-63-0, 64-17-5, 67-56-1
Carbon Dioxide: 124-38-9

ZEP DYNAMO PROD #0350

Can size: 20 oz.
Sizes available: Dozen case
